ABOUT

Results-driven software engineer with 6 years of experience excelling in delivering top-notch solutions. Proficient in React.js, Vue.js, Laravel, Node.js, Express.js, and TypeScript. Possess strong soft skills, enabling effective collaboration and communication within teams. Self-motivated and capable of working independently with minimal supervision.

TECHNICAL SKILLS

- **Languages:** HTML/CSS, Typescript/Javascript, PHP, Dart, C++
- **Tools:** Postman, Slack, Docker, Vue Devtools, TailwindLabs, Figma
- **Frameworks/Libraries:** ReactJs, Vuejs(2/3), ReactNative, TailwindCSS, NuxtJS, BootstrapCSS(early adopter), Laravel, ExpressJs, NestJs, HeadlessUI, JQuery
- **State Management:** Redux, Context API, Pinia, Vuex
- **Databases/ORM:** PostgreSQL, MySQL, Sequalie ORM, TypeORM, Eloquent ORM, Redis
- **Version Control:** Git, Github, BitBucket
- **Unit testing:** Jest, Enzyme, Vitest
- **Continuous Integration and Deployment:** CircleCI, TravisCI, GitHub Actions, AWS Codepipeline
- **Others:** AWS, Heroku, Design Systems, Atomic CSS, Laravel Nova, Retool, Websocket

EXPERIENCE

FiatMatch, Canada(Remote) - Software Engineer

MAY 2022 - PRESENT

- Deployed and provisioned core backend business service on AWS using Codedeploy and Elastic Beanstalk
- Built the transaction money flow from the ground up with a strict security policy to ensure the integrity of funds.

-
- I facilitated integration with external financial partners by leveraging web technologies such as webhooks
 - Setup robust KYC and KYB systems to ensure the legibility of both users and businesses
 - I contributed to developing the admin interface and its functionality using ReactJS and Retool components. Additionally, I utilized Express.js to create and expose the necessary APIs for seamless integration.

Reftek Consulting, Lagos(Remote) - *Software Engineer*

OCTOBER 2019 - APRIL 2022

- I collaborated with other developers to create the admin system's user interface for a product with a user base of more than 400,000 people and has significantly contributed to facilitating users' earnings, surpassing a remarkable milestone of \$1,000,000 through the sale of digital products and services. (<https://selar.co/>)
- Built the real-time web dashboard and rest api backend for a platform that monitors mobile business assets using NuxtJs, Laravel, Redis, and Websockets. ([Playstore](#), [Website](#))
- Mentored interns and junior developers to help them become competent software engineers.
- Collaborated closely with UI designers to transform high-fidelity prototypes into a web interface that is both responsive and accessible.
- Integrated data from backend REST api using AJAX technology
- As the engineering team lead, I provided technical guidance, coordinated project tasks, and ensured the successful execution of software development projects.

Andela, Lagos(Hybrid) - *Software Engineer*

MARCH 2019 - SEPTEMBER 2019

- Worked with world-class talent around the globe to deliver high-quality software products
- Collaborated with a distributed software engineering team to develop an internal product named WatchTower using Laravel for the backend api and ReactJs for the user interface
- Wrote extensive unit and integration tests using Jest, Enzyme, and Cypress
- Setting up CI/CD pipeline for the team project to ensure consistent builds

Sycamore Africa, Lagos - *Fullstack Developer*

MARCH 2018 - MARCH 2019

- Tasked with converting Figma prototypes to a usable web interface using Vuejs.

-
- Built the onboarding flow in which more than a thousand users used to get access to the in-house learning management solution.
 - Developed, deployed, and maintained event and ticketing systems using Vuejs and Laravel API thereby contributing to the organization's impressive turnover rates

Reftek Consulting, Lagos - *Fullstack Web Developer*

JULY 2017 - FEBRUARY 2018

- Worked on the backend api using Laravel and frontend using HTML, CSS, and JQuery for a medical startup app.
- Collaborated with other engineers to build a social media engagement tracker app in which I worked mostly on the backend.
- Built and provided technical support for a university residency management portal

Anjonix Vyte Technologies, Ota - *Intern*

JANUARY 2016 - FEBRUARY 2017

- Worked on a school management solution using PHP and MySQL that provides a seamless transition into electronic learning

OPEN SOURCE

Jitsi, Worldwide

- Creator and lead maintainer of the official Jitsi Vuejs package ([NPM](#), [Github](#))
- Jitsi Meet comprises a collection of Open Source initiatives enabling individuals to utilize and implement video conferencing platforms with cutting-edge video quality and features.

EDUCATION

Lasu State University, Ojo - *Computer Science*

SEPTEMBER 2018 - SEPTEMBER 2018

VOLUNTEERING

HOPE Foundation, Lagos - *Technical Unit*

JANUARY 2019 - PRESENT
